*"A circus of botanical imagination."*

I am inspired by nature and my floral design style is wild, loose and distinctive. I only allow myself to take on a small number of events each year in order to work closely with my clients to offer them a truly bespoke experience. When it comes to the events I prefer creating a living tapestry and allowing the flowers to showcase themselves through suspended florals and wild runners, I quote for every event on an individual basis, depending on the size and style of the pieces and the materials needed to make them.
